2.2 WORKING WITH SUPPLIERS

All suppliers, within the scope of the programme, will be informed of InNature Berhad's expectation through our Supplier Code of Conduct. Suppliers are expected to commit to The Supplier Code of Conduct and must have read and returned a signed copy to the company.

All suppliers within Group 1 are required to perform self-assessment, obtain B-Corp certification and update InNature Berhad on the certification if it is due for renewal. They will be screened for good practices in reducing GHG emission, following standards for solid waste production and Biodiversity practices. They are further required to report data and achieved target set for the reduction in GHG emissions, solid waste and impact on biodiversity by 2030.

All suppliers within Group II are encouraged to share a copy of a completed ethical screening with InNature Berhad, if it is available.

InNature Berhad expect the staff who engage with the suppliers to perform a preliminary risk assessment on the requirements stated in the Supplier Code of Conduct, before introducing and signing on new suppliers. Staff must explain:

- The need for total transparency of working conditions;
- The requirement of regular assessment if we discover non-conformity to the Supplier Code of Conduct and the policy requirements;
- The commitment to continuous improvement;

all of which are requirements of doing business with InNature.

Should issues with compliance arise, a Corrective Action Plan (CAP) will be developed and agreed with the suppliers. All suppliers are expected to commit to making the improvement and follow up on corrective action. Verification of all corrective actions must be carried out through desktop evidence.

InNature Berhad understands the challenges of providing goods and services in the fast moving retail environment and does not expect conditions to be perfect all the time. We understand that there will be improvements to be made and we commit to giving suppliers the time and space to make changes to their processes.

We will not pull out of suppliers who are transparent about issues they are working on to improve. However, if we are not confident of the transparency, we may decide to end the trading relationship.
